

IN PARTNERSHIP WITH

A SCHROEDAHL CHANNEL PARTNER

In case you missed it, we are excited to announce that STL is now an official Schroedahl Channel Partner!

For several years we have been proudly supplying SCHROEDAHL valves and spares to our valued customers. And then, in 2023, we decided to formalise our partnership.

WHO ARE SCHROEDAHL?

With a history spanning over 60 years, SCHROEDAHL has become a trusted name having delivered more than 60,000 valves worldwide. Established in 1962, this family-owned business has been an integral part of the esteemed American CIRCOR Group since 2015.

Renowned as a leading global manufacturer, SCHROEDAHL specialises in producing high-quality special valves for industrial and process plants, as well as nuclear and fossil power plants.

Introducing the remarkable SCHROEDAHL automatic recirculation valve - an innovative solution designed to safeguard centrifugal pumps from overheating, instability, and cavitation during periods of no or low process volume. Its outstanding performance and cost-effectiveness make it a superior alternative to conventional control valves.

Tailored to meet the exact specifications of customers, SCHROEDAHL control valves enhance control processes in power plants and industrial facilities, ensuring optimal efficiency and effectiveness. From small-scale applications like biogas

plants to large-scale projects such as 1,600 MW power plants, their control valves serve a diverse range of applications:

- Steam conversion
- Steam cooling
- Cooling water and feed water control
- Pump protection
- Level control
