

Spence CDS and CDH Series Sanitary Thermostatic Steam Trap

Figure 1. CDS and CDH Series Sanitary Thermostatic Steam Trap

Introduction

The CDS and CDH Series steam traps are balanced pressure design with Inconel® welded bellows capable of releasing condensate within 10°F / -12°C of saturated pressure. All other interior wetted components are of 316L stainless steel. It has an interior body finish of at least 20 µ in. Ra and exterior body finish of at least 32 µ in. Ra. Trap utilizes sanitary body clamp allowing disassembly for inspection or cleaning and be entirely self draining in horizontal or angle piping configuration. Trap end connections are standard tri-clamp. Thermostatic actuator employs a conical valve lapped to the seat. Traps have SLR orifice where drainage at saturated temperatures is required.

Features

- **Steepest Interior Surfaces** - Designed to completely drain without puddling.
- **Stainless Steel Body** - Body material is 316L Stainless Steel with 20 µ in. Ra internal finish and 32 µ in. Ra external finish.
- **Self-centering Valve** - Leak tight shut off. Assembly of actuator and valve to impingement plate allows the valve to self align with center of the orifice.

CDS and CDH Series

Specifications

The specifications section on this page provides the ratings and other specifications for the CDS and CDH Series.

Available Configurations

- Type CDS202:** Low capacity
- Type CDS203:** Medium capacity
- Type CDS204:** High capacity
- Type CDH-AI-AO:** Horizontal inlet and outlet
- Type CDH-AI:** Horizontal inlet, vertical outlet
- Type CDH-AO:** Vertical inlet, horizontal outlet

Maximum Operating Pressure⁽¹⁾

100 psig / 6.9 barg

Maximum Operating Temperature⁽¹⁾

338°F / 170°C

Maximum Allowable Pressure⁽¹⁾

150 psig / 10.3 barg

Maximum Operating Temperature⁽¹⁾

366°F / 186°C

Maximum Capacity

See Tables 2 and 3

Materials of Construction

- Body:** 316L Stainless steel
- Gasket:** Viton®, Teflon®, Ethylene Propylene Diene Monomer (EPDM) or Tef-Steel
- Actuator and Actuator nut:** 316L Stainless steel
- Valve:** 316L Stainless steel

Options

- Electropolish
- SLR Orifice
- B Bellows for low subcool

Approximate Weights

- CDS Series:** 1.8 to 2.3 lbs / 0.8 to 1.0 kg
- CDH Series:** 2.6 to 3.9 lbs / 1.2 to 1.8 kg

1. The pressure/temperature limits in this Bulletin and any applicable standard or code limitation should not be exceeded.

- **Temperature Sensitive Actuator** - One moving part. 316L Stainless Steel, fail open, welded actuator for maximum corrosion, thermal and hydraulic shock resistance.
- **Directional Discharge** - Erosion prevented by directing discharge to center of piping.
- **Maintenance** - Can be easily removed and disassembled for sterilization and/or repair.
- **Industry Standard Food Grade Gasket** - White Viton® food grade gasket offers superior performance for higher pressure steam applications.
- **Large Orifice Selection** - Broad selection of orifice sizes provide greatest sizing and selection flexibility.
- **Superior Air Handling** - Best air handling capability provides for fast startup.
- **Unique SLR Orifice Option** - Provides drainage at saturated temperatures, instant reaction to load changes and guaranteed fail-open operation for extra critical operations.
- **Bar Stock** - Connection fittings are not welded onto inlet and outlet pieces.

Principle of Operation

Thermal actuator is filled at its free length with a liquid having a lower boiling point than water. On start-up, valve is normally open to discharge air, non-condensibles and condensate. When steam enters trap, thermal actuator fill vaporizes to a pressure higher than line pressure. This forces valve into seat orifice to prevent any further flow. As condensate collects, it takes heat from the actuator, lowering internal pressure. Line pressure will then compress thermal actuator to open valve and discharge condensate. Valve opening automatically adjusts to load conditions from minimum on very light loads to full lift at maximum load.

Installation

1. Install trap in a vertical line with the inlet at the top and the outlet at the bottom.

Note

Although this trap functions both horizontally and vertically, the vertical installation allows full self-draining.

2. Install NPS 1/2 to 3/4 / DN 15 to 20 service trap with 3/4 in. / 19.0 mm inlet gasket.
Install NPS 1 to 1-1/2 / DN 25 to 40 service trap with 1-1/2 in. / 38.1 mm inlet gasket.
3. Isolate the sanitary steam trap by using a valve suitable for sanitary steam applications.

IN. / mm
